# CHESSGAME

User Documentation

1 – The Game

This game is an enhanced chess game. You can play classical chess but also flying chess and war chess.

Flying chess is a mode that allows you to move your pieces over other pieces, like classical chess Knight piece.

War chess offers you a different set of pieces : instead of classical set of pieces, each player will have 6 Knights, 4 Bishops, 3 Rooks, 2 Queens and 1 King, like on the picture that fallows :
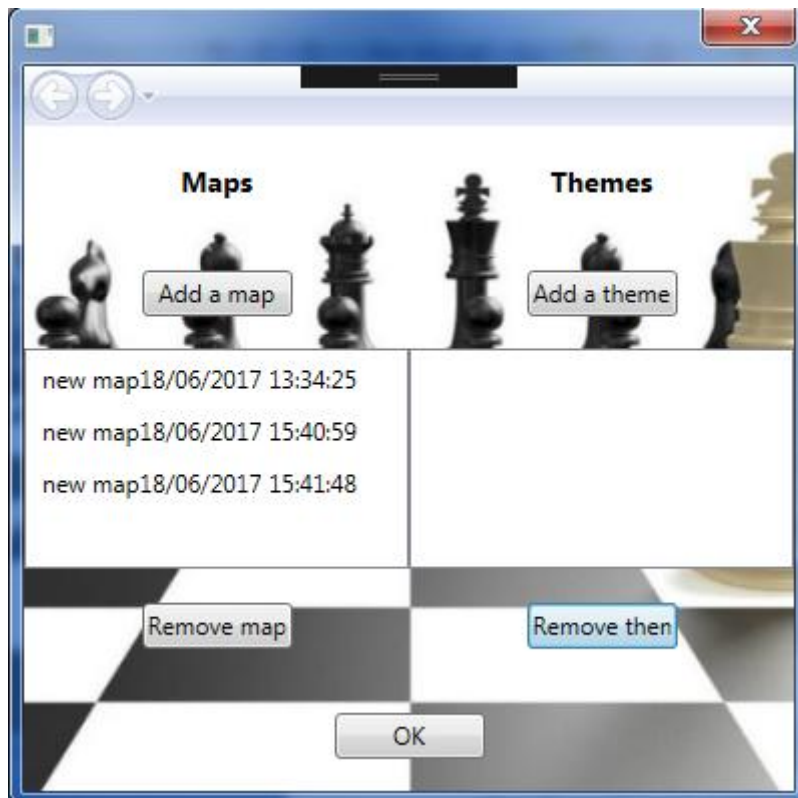

2 – Navigation

First window gives you 4 possibilities :

Configuration : go to the configuration window where you will be able to administrate chessboard maps and pieces themes.

New game : go there to play!

Load game : not available in this version.
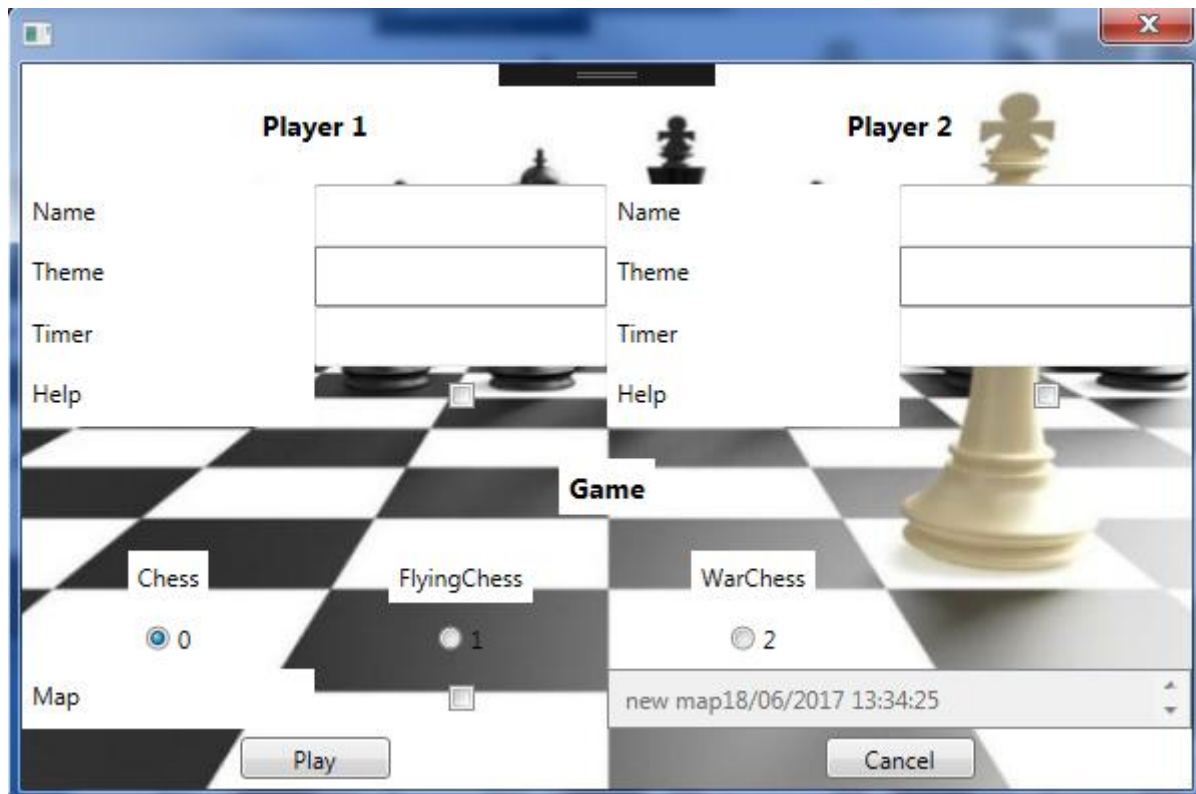

Quit : quit the application.

Add a map : opens a dialog that allow you to add an image file as map.
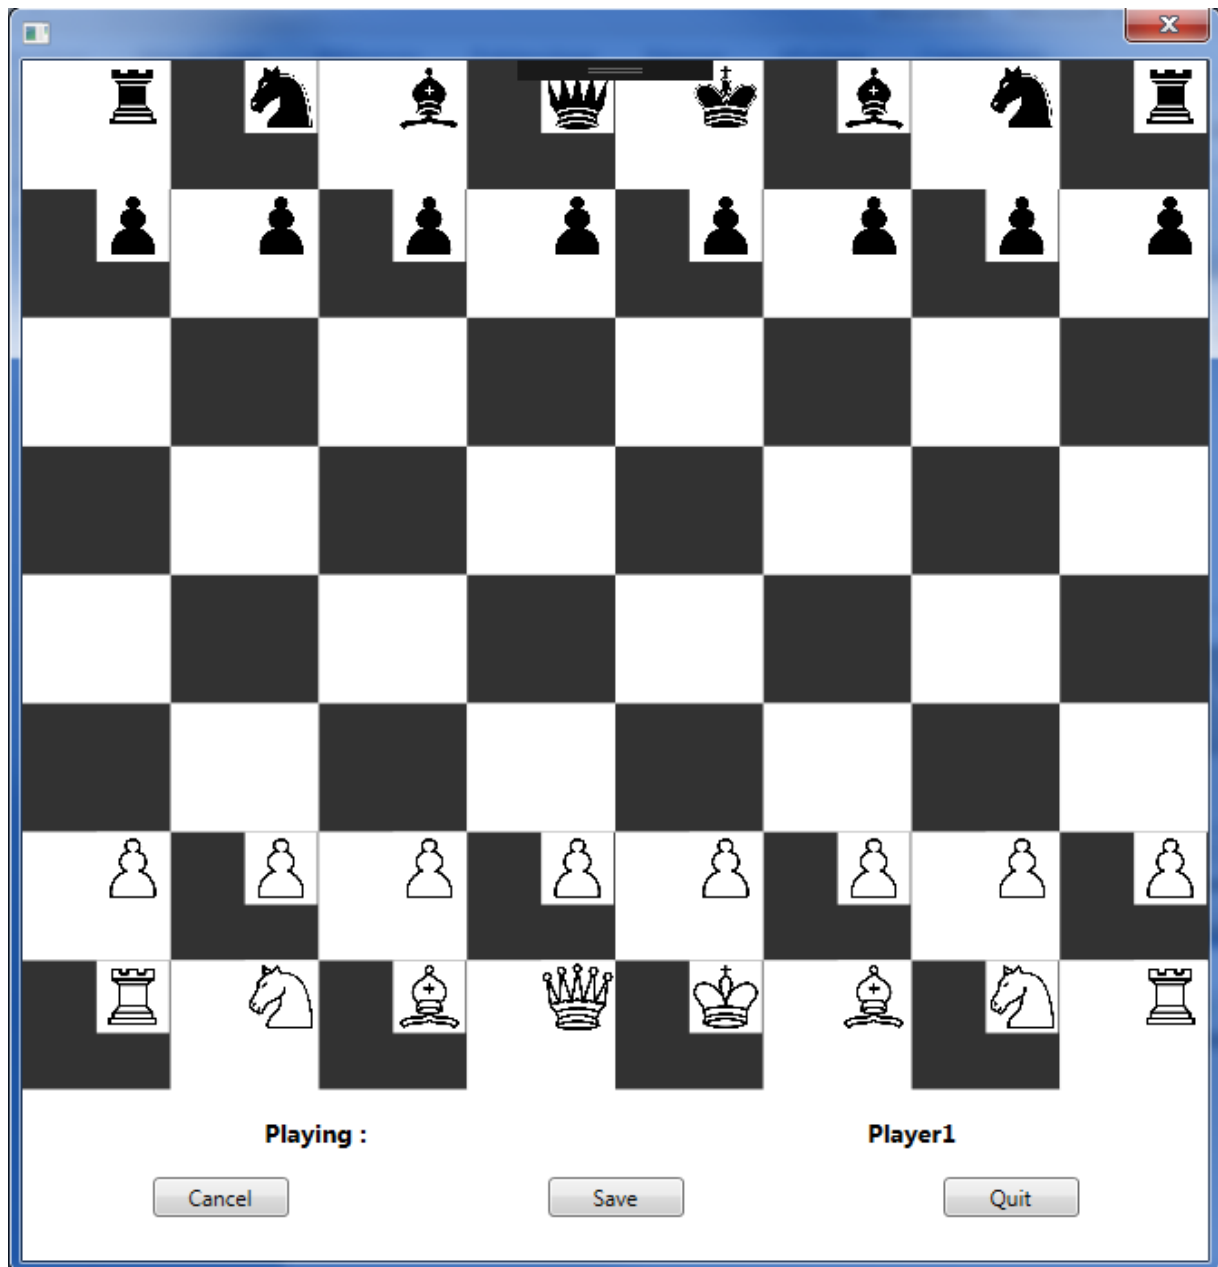

Remove map : remove the selected map.

Add a theme : opens a dialog that allow you to add an image file for each kind of piece.

Remove theme : remove the selected theme.

OK : go back to main window.

This window offers you the possibility to personalize your game : you can enter players name, choose a theme for each player, choose help or not, choose your mode and add or not a map to your chessboard…

The game window is simple, you click on a piece to move it and on the case where you want it to move !
